

MAINTENANCE

Your CHAT BOARD® product requires minimal daily maintenance and by following these simple guidelines, it will look beautiful for years to come:

Glass

As a rule, we recommend cleaning the board using a CHAT BOARD® Eraser or a soft cloth, depending on how much writing/illustration needs to be removed. Next, polish the glass with the CHAT BOARD® Cleaner, a window cleaning spray or regular rubbing alcohol.

NB

Never spray Cleaner directly on the writing/illustration as this will prolong the cleaning process, and make sure you always use a soft material such as a paper towel - or our favourite: a microfibre cloth.

In case someone has accidentally used permanent marker on the glass, this can be removed with rubbing alcohol, after which the board will be ready to use as normal.

Kvadrat Remix & Remix Screen fabric

Professional dry cleaning with tetrachloroethylene, normal process.

BuzziFelt

Vacuum clean regularly. Do not wash. Do not remove the BuzziFelt from the product. Treat spillages immediately. Professional dry clean or wipe clean with a pH neutral soap and a damp cloth.
